

*Brain Injury
Rehabilitation Center*

Residential - Transitional Program

Individualized treatment plans are established upon admission clearly defining rehabilitation goals and potential discharge plans. All programming integrates the Hierarchy of Neuropsychological Functions, a progressive hierarchy of cognitive skills that build upon each other in a manner that facilitates efficient progress. The treatment team utilizes the approach to ensure proper coordination of all therapies.

Program Admission Criteria:

Male or Female 18 years or older

Requires more than 12 hours of structured support in the functional area: Independent Living

Requires therapeutic intervention in any of the following functional areas:

- | | | |
